<p>CPSC Certificate of Compliance CC-SP-007</p>	
<p>Scope</p>	<p>Model Numbers CGUB1-60MLV3-XXXX are covered by this Certificate of Compliance (CoC). This CoC provides information for preparation of CPSC General Certificates of Conformity (GCC).</p>
<p>Bracketing</p>	<p>As indicated below, additional Models are included in this certificate by using bracketing, a design of a CPSC Study such that Models on the extremes of certain design factors (e.g., solvent ratio) or representative Models, with certain design factors which do not impact the study (e.g., color) are tested according to the full study design. The design assumes that the acceptance of bracketed Models are represented by the Models tested.</p>
<p>Statements of Compliance</p>	<p>A. Samples of Model CGUB1-60MLV3-NATL were evaluated and tested using the Poison Prevention Packaging Act Standards as required under the current Code of Federal Regulations (CFR). This Model meets the <i>Effectiveness specifications</i> (16 CFR 1700.15(b)) when tested by the method described in 16 CFR 1700.20.</p> <p>B. A sample of Model CGUB1-60MLV3-NATL was evaluated and tested using the Child Nicotine Poisoning Prevention Act (CNPPA) of 2015 and the Protocol described in CPSC’s industry letter dated March 8, 2019 titled: Nicotine Packaging Test Parameters. Model CGUB1-60MLV3-NATL meets the requirements for Nicotine Flow Restriction: CPSC’s Test Methodology based upon the average of four measurements of Samples filled with the worst case placebo ratio of vegetable glycerin and propylene glycol (70:30 VG:PG). Therefore, solvent ratios with higher amounts of vegetable glycerin, e.g., 80:20, 90:10 VG:PG are deemed to be compliant with the requirements by bracketing.</p> <p>C. All Model colors (CGUB1-60MLV3-XXXX) of the same size and diameter as Model CGUB1-60MLV3-NATL are deemed to be compliant with requirements described in Statements of Compliance A and B by bracketing.</p>
